# The Medeco Angle.

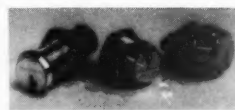

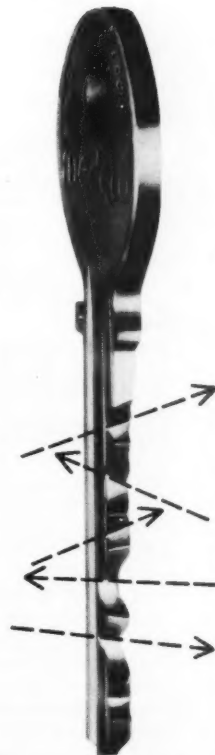

It's a patented angle on protection that other lock manufacturers can't come close to matching. Whether you select our High Security Switch, Rotary Switch, or Cam Locks, your most important installations will immediately benefit from the incomparable security barrier created by every Medeco lock.

A good deal of our product superiority is obvious at first glance—just look at the famous Medeco key. It's definitely a cut above the rest. Traditional biting configurations on the key blade are combined with Medeco's revolutionary angular cuts. This exclusive arrangement of surface planes results in 250,000 unique key configurations—more than any other locks in this category can provide. Another newsworthy fact—additional Medeco restricted keys can only be manufactured at our facility. And only authorized persons whose names are registered in our files can reorder additional keys. Medeco provides the ultimate in key control. And peace of mind.

Our celebrated Cylinder is as impressive as our key. It's virtually unpickable, employing an unsurpassed double locking process. As key and cylinder interact, tumbler elevation is fortified by tumbler rotation. Nothing unlocks a Medeco Cylinder except the keys that come with it. Even drills can't leave an impression, thanks to hardened steel protective inserts.

Business and industry will find many applications for these UL Listed crime fighters: Medeco's High Security Locks are especially designed for elevators, burglar alarm systems, computer circuits, electrical door strikes, police call boxes, and for every circuit that demands a top security. Our High Security Locks provide normally open and normally closed electrical contacts. Terminals accept solder-type or quick-connect wiring. Available with or without leads. Our Rotary Switch Locks provide optimum security for the control unit of burglar alarm systems. Features include 90° operation, and key withdrawal in two positions. Functions may be varied to accommodate many usages. Rounding up our list—Medeco's Cam Locks, perfect for control cabinets, vending applications, and laundry machines.

The Medeco Angle means more than protection. It represents the highest overall standards of security excellence. Count on Medeco to meet the security requirement of both new and existing installations. Medeco is the Right Angle for the ultimate in pin tumbler security protection.

**medeco**  
The lock to beat.

# Sierra® BALLISTIC HELMETS for safety and comfort

Maximum protection and wearing comfort are featured in Sierra's line of police and security ballistic helmets. The Head-guard helmets range from the lightweight GP-380 (2.1 lbs.) offering protection up to .38 caliber handguns to the SD-357 (4.2 lbs.) repelling up to .357 Magnum handguns.

All Sierra helmets provide comfortable head mounting with full ear protection without impairing hearing and offer excellent protection from bump and ballistic impacts. Minimum use of metal components affords additional protection to the wearer.

These clean, modern helmet designs are available in a wide range of colors and finishes, including dull, non-reflective, to meet department or company needs. Sierra helmets interface with all standard helmet accessories.

For complete information and firing test data, call or write Dennis Salmans at:

# Introducing the new

## EH-44 TAMPER-PROOF ENCLOSURE

- COMPACT
- ATTRACTIVE
- TAMPER-PROOF
- INDOOR/OUTDOOR

The EH-44 enclosure provides an attractive low cost, tamper-proof housing which may be used indoors or outdoors in a protected environment. Designed for the smaller cameras, the EH-44 accepts cameras with auto-iris, fixed focal length lenses.

Fully ventilated, the EH-44 features authorized key lock entry to discourage tampering and vandalism. The window is made of mar-resistant lexan. A removable rear plate provides easy camera adjustment and cable installation.

# **LOOKING FOR A SLIC LIGHT?**

The SLIC Fara-Lite™ is the most sophisticated and versatile flashlight made in the U.S. today. Originally engineered for underwater use, the SLIC light is waterproof to 300 feet, buoyant, lightweight, rechargeable, and has an explosion proof high impact ABS housing. It features: a beam variable in width (spot to 30°) and intensity (up to 125,000 candle power), an LED charge indicator, and a magnetic switch with a Solid-state Light Intensity Controller (SLIC). It is available with either a small or large head, and will save many hundreds of dollars in operating costs. Lower cost On-Off models of the SLIC light are also available, less only the charge indicator and light intensity controller. A full complement of accessories and chargers is available for all models. For particulars, please write or call. Dealer inquiries invited.

**RECHARGEABLE

## For crying out loud at unauthorized passage

It's enough to dissuade the most determined intruder. Detex Exit Alarms blare out at misuse of emergency exits, internal security doors or other openings. And they keep up the clamor until quieted by a control key, which also permits disarming for authorized entry. Easy connection to a

Detex Remote Indicating Panel affords efficient surveillance of multiple doors.

No. 2504 (electric) or 2505 (with standby battery built in) in flush-mounted design.

Surface-mounted models include No. 504 (electric) and No. 505 (with standby battery built in).

## THE "IMPOSSIBLE" DREAM COMES TRUE

In 1970 'IET' started manufacturing low light level CCTV cameras using all silicon target technology. Our dream was to be the leader for the industry in current design techniques and quality cameras. For 5 years now 'IET' has done just that. We have shown the world the way out of the dark ages and into the light. From silicon target to SIT to ISIT and beyond.

Why not let us show you the light? Our dream is a reality. We can make your IMPOSSIBLE dream come true too.

# Koyo®

## Security systems you can count on.

Performance. Trouble-free performance. That's what counts in a security system. Every component has got to work when it's needed. And keep on working. Day after day after day. Doing the job it was engineered to do.

Downtime? That's the scourge of our business. When lives and property are on the line you need equipment that won't lie down on the job. Equipment that is durable. Under any and all conditions. But if and when something does go wrong, if and when a component does need an adjustment or repair, you can enjoy the peace of mind of Koyo's one day turnaround service.

Koyo. Koyo 2nd generation security and surveillance systems. Koyo... for the quality components that assure reliable performance.

Before you invest in any security system, or specify any CCTV equipment, look into Koyo. Call or write for friendly advice or Technical Data Sheets on any of our equipment.

Koyo International Inc. of America  
division of  
**KOYO SEIKO CO., LTD.**

Headquarters:  
1114 Avenue of the Americas, New York, N.Y. 10036  
(212) 869-1919

### KOYO PRECISION CLOSED CIRCUIT TELEVISION EQUIPMENT

#### ■ High Resolution Cameras (550 lines)

Model TVC-777/1" Vidicon/Low Light Level (0.5 foot candles)/High Speed automatic light compensation/Silicon-transistorized circuitry.

Model TVC-999/1" Vidicon/Low Light Level (0.5 foot candles)/High Speed automatic light compensation/Silicon-transistorized circuitry/Special White Clipper Switch

Model TVC-999S/Same as TVC-999 with external sync

Model JL-451/1" Vidicon/Multi Purpose

Model TVC-888/3/4" Separate Mesh Vidicon

Model TVC-888S/Same as TVC-888 with external sync

Model TVC-1000/3/4" Separate Mesh Vidicon/Silicon-transistorized circuitry/Special White Clipper Circuit

#### ■ Solid State Monitors

Model MV-9/9" Monitor (600 lines resolution)  
Model MV-17S/17" Monitor (750 lines resolution)

Plus a complete line of lenses and all CCTV accessories. Instant inventory: all equipment stocked in both our New York and Los Angeles warehouses for same-day shipment.
